

SECURE AT ALL TIMES

Assured, best practice I.T logistics

2024

A comprehensive logistics service

For 17 years, Move I.T. has specialised in providing logistical solutions to organisations across multiple industries including banking, finance, commercial, retail, pharmaceutical, education and corporate.

Partnering nationally and internationally

We partner with IT Asset Disposal companies nationally and internationally, engaging in a collaborative approach to meet the needs of their clients with an assured logistical service. Our business model and ethos is underpinned by approved standards of practice, offering intrinsic advice on secure European and global moves, and a consultative approach to address our client's complex needs.

High risk — and some of the largest moves across the UK

The Move I.T. team comprises a large on-road and on-site workforce, experienced in managing high security, high risk and some of the largest moves and relocations across the UK. We understand you need a partner capable of mitigating risk (i.e. financial loss and environmental impact) and providing trusted advice to complex logistics challenges.

1

Transparent and secure point- to-point delivery

Our business is built on a systems thinking approach that incorporates the needs of all stakeholders in the supply chain. Move I.T. works to achieve standards of practice that respond to environmental, security, and health and safety challenges. This allows us to monitor our client's environmental impact and that of our business as a whole, while delivering a high- quality, consistent and secure service.

2

Environmental, Social & Corporate Governance

Move I.T. provides clients with a logistical service that drives value whilst strengthening our environment and communities. We operate with systems and processes that provide demonstrable measures and outcomes of our sustainability goals, that also align with the compliance and Environmental, Social and Corporate Governance (ESG) ambitions of our clients.

3

Social engagement — invested in our communities

Move I.T. operates an equitable systems approach inclusive of all stakeholders i.e. staff, suppliers, clients, and partners, involving practices that provide transparency across our performance that drives continued developments. Our broader ESG goals involve targeted contributions toward societal and community needs that focus on creating both sustainable and resilient systems for improved social engagement, mental health, and well-being.

4

European destinations — road, sea & air freight

Move I.T. provides all services across Europe operating within a regulatory compliance framework both independently and in collaboration with European partners. Our working model for European destinations covers road, sea, and air freight and ensures that all waste directives are adhered to. To guide our clients both working with European partners and those on a trajectory of growth across Europe Move I.T provides consultancy as a European Logistical Broker.

5

A partnership approach to procurement

Move I.T. provides a partnership approach to clients throughout tendering processes to ensure the logistical requirements of any move are operationally designed to deliver best-practice providing auditable, risk management, and sustainable outcomes. This collaborative approach to procurement provides our clients with the opportunity to engage in a consultative process enabling the co- production of bespoke logistical solutions.

Move I.T. provide services to many of the UK's largest banks, retailers and corporate firms

Banking

Working with some of the UK's largest financial organisations, Move I.T. is well-versed in managing the data security concerns this sector faces during branch closures, building and data centre exits. Onsite auditing, secure storage and redeployment are key services managed by Move I.T. – and often within critical timeframes.

Retail

Move I.T. has managed both singular and multisite collections nationwide for some of the UK's largest retail organisations, overcoming various access challenges due to the nature of branch locality. Move I.T. often project manage multisite scheduling of works to meet the client's needs post-deployment, with attention to time and cost efficiency.

Education

Move I.T. work in partnership with asset finance organisations to recover end of lease assets from schools, colleges and universities UK wide. Our engineers conduct onsite cosmetic checks and audit reporting during the recovery process providing full traceability across the supply chain.

Pharmaceutical

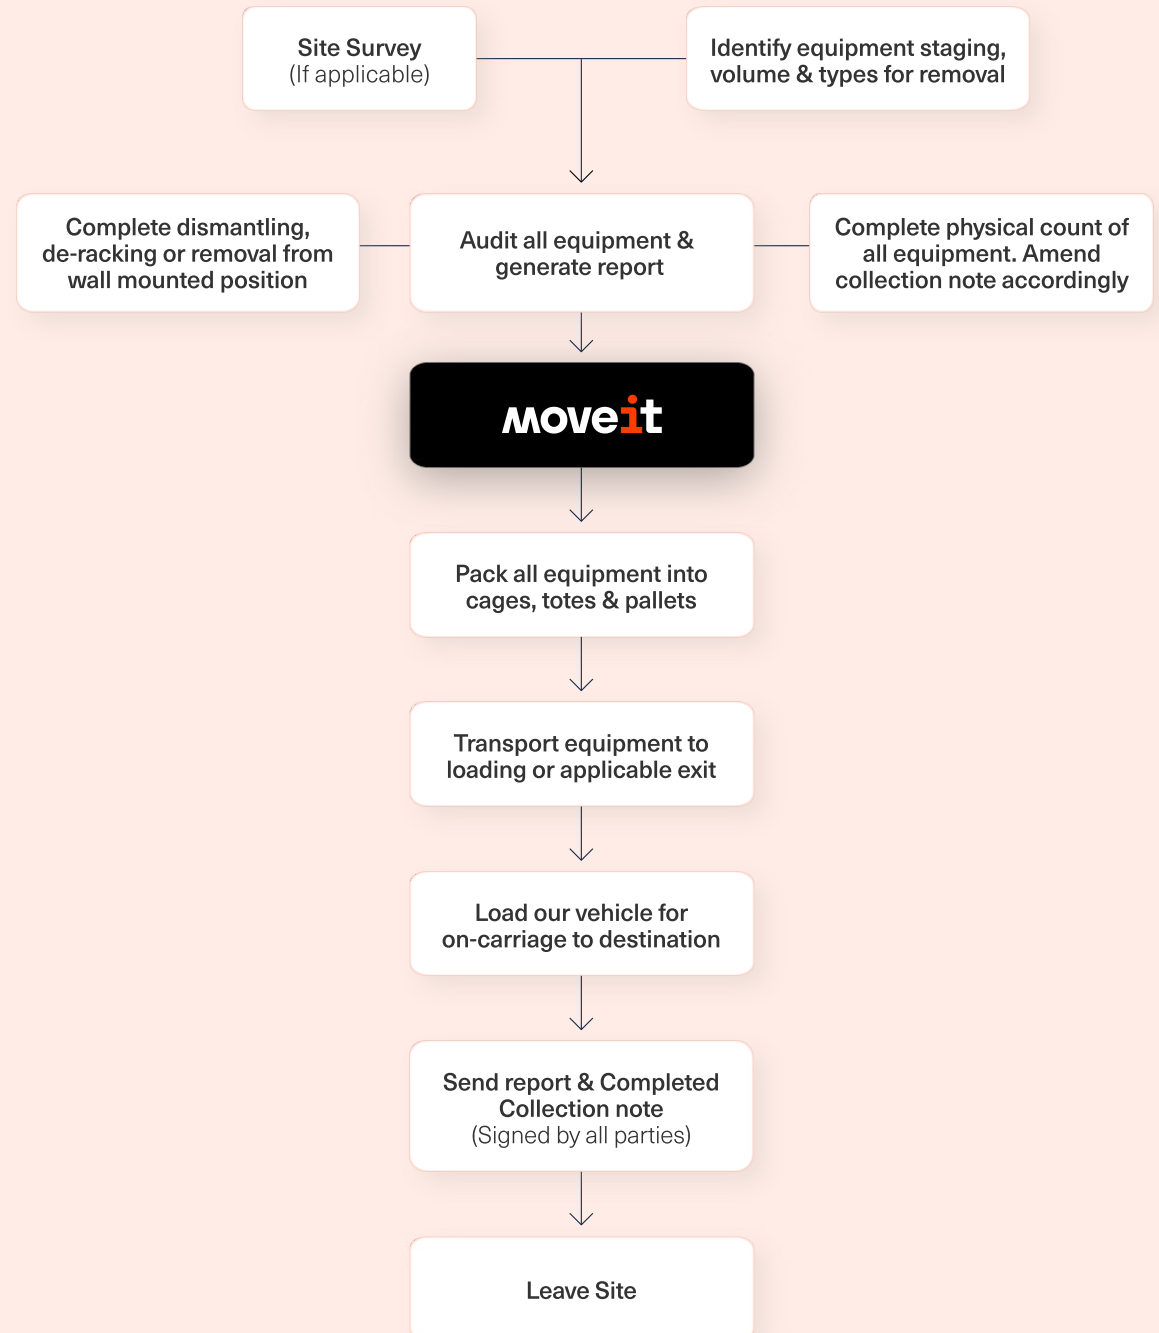

Move I.T. provide point-to-point dedicated secure transportation of high value industry specific products, resource and assets across the UK and Europe. This service provides applicable methods of handling and operates within multiple security parameters meeting industry best practice. Often these moves are time critical and dependent on variable control mechanisms.

Secure I.T. collection service

Move I.T. has provided collection and delivery services to multiple industries across the UK and Europe for over 17 years. Over this time period we have evolved our business model inline with advances in technology, security and environmental policy and practices.

- Loose I.T. collections
- Large out of 'Gauge' equipment e.g. racks, tape silos
- Disconnection from workstation
- Real-time on-site auditing and reporting
- Weekend, overnight and bank holidays (24/7 Contact)
- Dedicated secure point-to-point

A TRUSTED I.T. LOGISTICS PARTNER

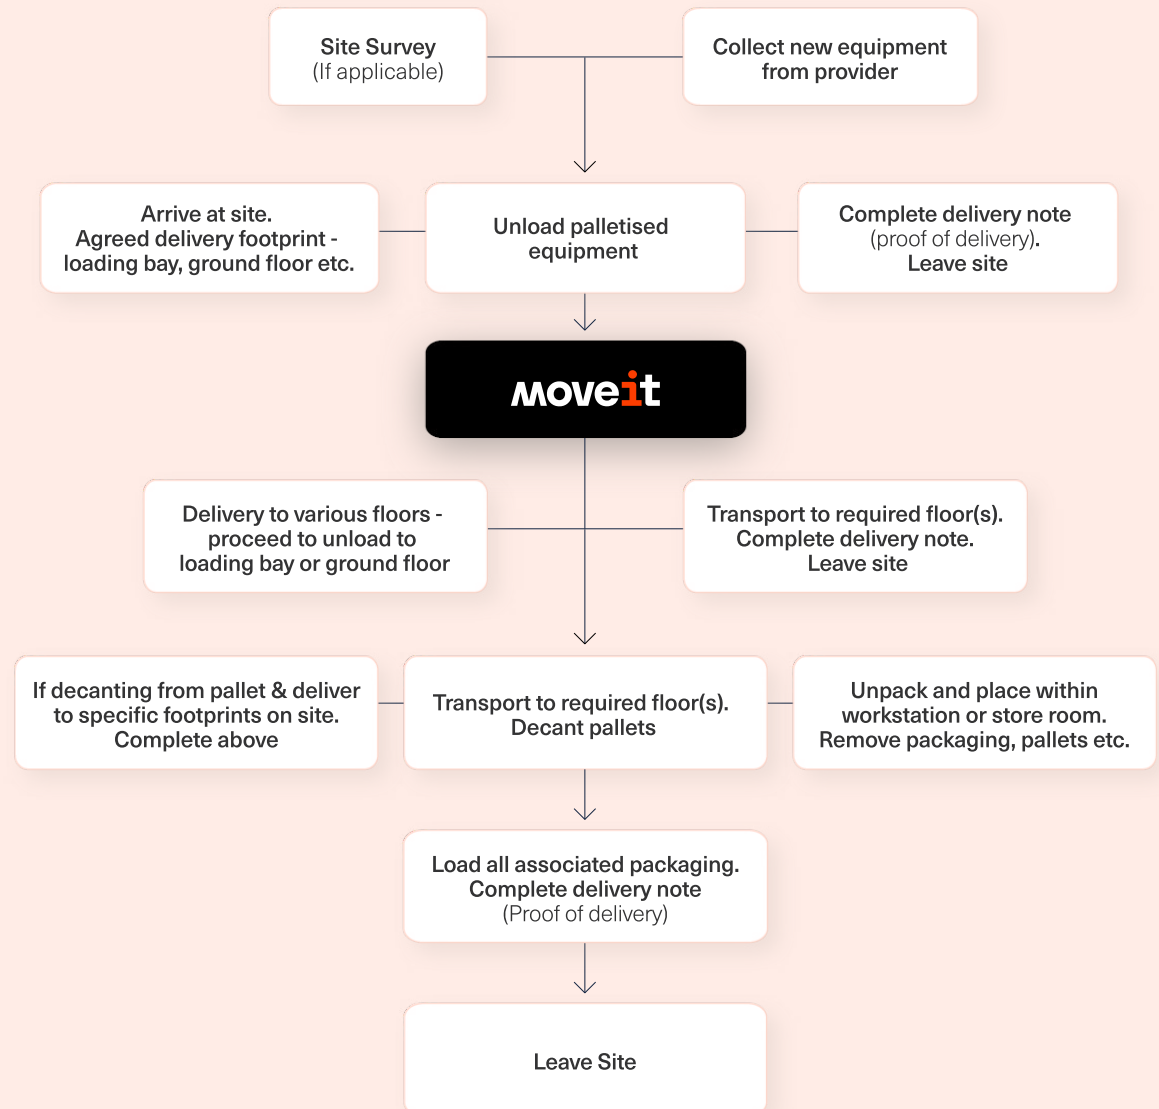

Secure I.T. delivery service

- Palletised deliveries
- Unpack and deliver to specific on-site footprint
- Reconnection to workstation
- Packaging removal
- Large out of 'Gauge' equipment e.g. racks, large servers
- Weekend, overnight and bank holidays (24/7 Contact)
- Dedicated secure point-to-point

Deployment services

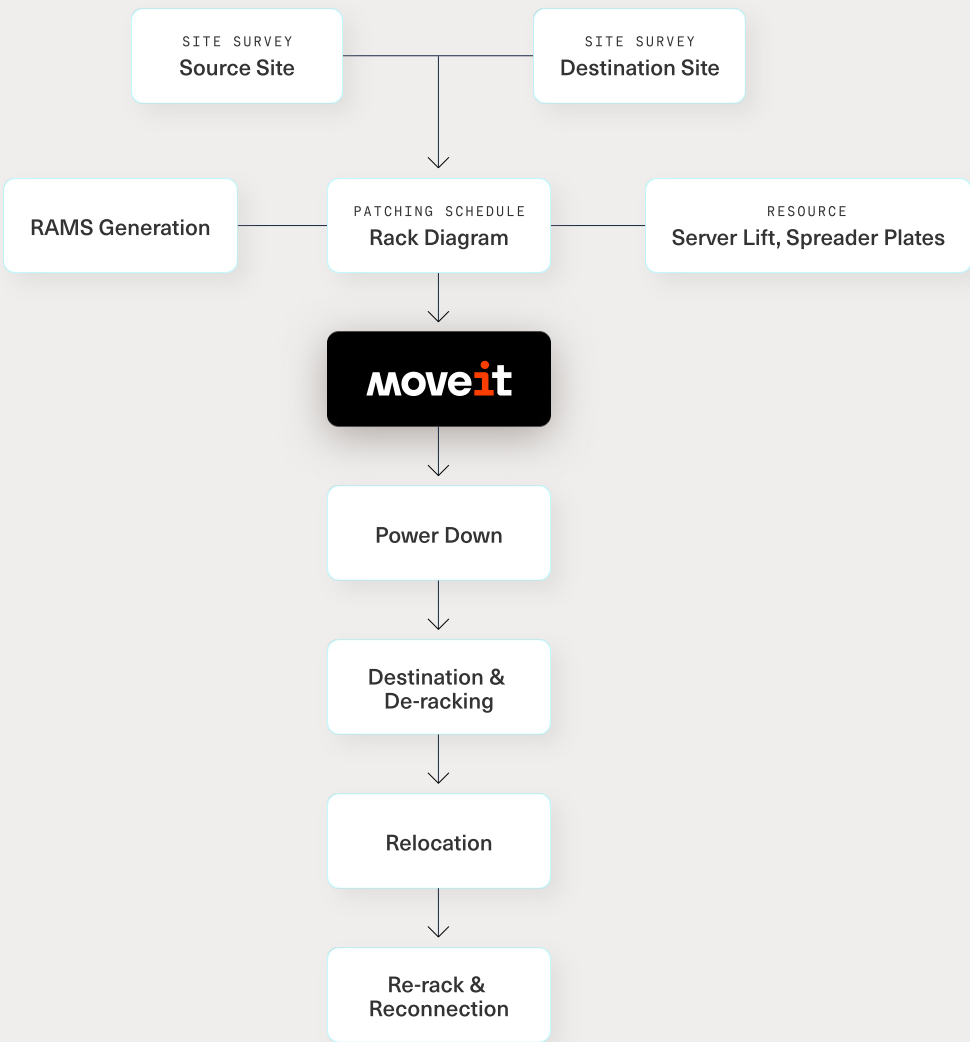

Deploying new technology to multiple sites requires coordinated and consistent collaboration from internal stakeholders, external partners and third-party service providers. We'll coordinate your entire rollout, from initial site survey to deployment.

Move I.T. engineers are proficient in handing and deploying to user desk position, removing all associated packaging post completed deployment of new assets. We can work on multiple locations simultaneously.

Workstation Installation

Our Workstation Installation involves setting up and configuring your organisation's individual workstations for the best working environment. Move I.T. aims to streamline the process, ensuring each workstation is properly equipped, connected to the network and configured to meet the specific needs of any user.

The typical installation process involves:

Peripheral setup. Peripherals such as printers, scanners, and external storage devices are connected and configured to work seamlessly with the workstation.

Testing and quality assurance. Each workstation undergoes thorough testing to ensure that all components are functioning correctly and software applications are running without issues.
